

ProAlgen[®]

Alginate Detox Supplement with Milk Thistle

Nordic Naturals ProAlgen formula demonstrates powerful heavy metal binding capacity in a simulated gastric environment. ProAlgen attaches to environmental toxins at a molecular level, encouraging their removal from the body.

Nutrient Support

Omega-3s and Omega-6s play a vital role in nutrient passage and elimination of environmental toxins at the cellular level. Our bodies need help, however, eliminating these toxins from our systems before reabsorption occurs in the gut and intestines. Nordic Naturals produces the finest quality detox formulas available, which are third party tested for effectiveness.

Supplement Facts

Serving Size: **1 Capsule**

Amount Per Capsule	% Daily Value	
Calories	0	
Calories from fat	0	
Total Fat	0 g	0%*
Sodium	36 mg	2%*
Alginate	400 mg	†
Milk Thistle	40 mg	†

* Percent Daily Values are based on a 2,000 calorie diet.

† Daily Value not established.

Ingredients: Algae-Bind (alginate), Milk Thistle, Kosher Vegicap (Hypromellose).

No gluten, yeast, milk derivatives, artificial colors or flavors.

Warning: Keep out of the reach of children

Suggested Use: One capsule three times per day with plenty of water, or as directed by your health care professional or pharmacist.

Store in a cool, dry place, away from sunlight.

Do not take if tamper evident seal is broken or missing.

Capsules per unit: **120**

Description

Through a simple combination of our unique Algae-Bind and supportive Milk Thistle Extract 80% silymarin, Nordic Naturals brings to you the best of both worlds. Algae-Bind has been proven to remove 100% of methyl mercury from a simulated gastric environment as well as significant amounts of lead, cadmium, aluminum and antimony. Milk Thistle offers liver support to ensure a healthy removal of toxins from both the blood and digestive systems.

This high potency formula joined with our Omega Oils will aid you on your way to a more healthful, pollutant free existence. Safe for every day consumption, this formula should be taken for at least four months at a time.

Suitable for vegetarians.

Pure & Great Tasting Omega Oils

LIVING IN A TOXIC WORLD

Unfortunately, many harmful toxins are unavoidable in today's environment. Lead, mercury, aluminum & cadmium can be found in various sources, such as lead from old paints, mercury in fish, cadmium from cigarette smoke and aluminum from medications. Toxic levels of lead affect nearly one million children in America.

Free radical havoc

It is becoming clear that many heavy metals suppress the immune system by producing free radicals, which accelerate aging and degenerative disease processes. Chronic exposure can interfere with our overall well being by burdening the liver and immune system, damaging essential fatty acid synthesis and reducing energy. Symptoms of heavy metal toxicity include memory loss, severe headaches, fatigue, nausea and anxiety.

Environmental toxin & free radical defense

Nordic Naturals has developed a safe and effective defensive formulation in small, easy to swallow tablets. Our Detoxification Formula consists of:

- **Algae-Bind™ Sodium alginate:** Our proprietary blend of highly charged alginate, a proven heavy metal and radioactive substance binder, that has been third party tested to show it effectively binds with many environmental toxins
- **N-Acetylcysteine (NAC):** A potent antioxidant and amino acid that stimulates glutathione synthesis, which then neutralizes many free radicals and toxic chemicals
- **MSM:** The sulfur source for the reactions to take place
- **Vitamin C:** An antioxidant working in conjunction with the NAC
- **Zinc:** Supports the immune system
- **Selenium (as selenomethionine):** A powerful antioxidant in its most absorbable form, which is a mineral antagonist to mercury

In a third party laboratory analysis, Nordic Naturals Algae-Bind™ alginate bound with the following heavy metals in a simulated gastric juice environment:

Nordic Naturals 3rd Party Analyses

Methyl Mercury	100%
Lead	28%
Cadmium	15%
Aluminum	14%
Antimony	5%

How it works

Heavy metals build up their presence in the body over time. They are leached from the bones and organs, and are then secreted into the digestive tract through the bile and reabsorbed. The liver is also secreting pollutants into the bile. Since no digestion of the alginate occurs, it remains in the digestive tract until secretion. Heavy metals dumped into the digestive tract molecularly binds with alginate, and are then secreted from the body together with the alginate. As the binding takes place based on molecular weight, other metals and minerals do not bind with the alginate.

Detox regularly

By taking Nordic Naturals ProAlgen three times a day, preferably with each meal for maximum benefits, you are able to greatly reduce the amount of toxins in your system. We recommend detoxifying for at least four months at a time and avoiding the obvious sources of heavy metals, like tuna and swordfish, in your daily life.

Using purified supplements such as our fine Omega-3 products can also assure you are receiving all the benefits of eating fish without ingesting heavy metals. For questions or additional information, please call us toll free at 800.662.2544 or visit nordicnaturals.com
